

## **Utah Attorney General's Identity Theft presentation overview**

The Utah Attorney General's office "Identity Theft" presentation will introduce attendees to state and federal identity theft statutes that define identity theft and that provide assistance and protection to consumers. It will also focus on the latest trends in identity theft and how to protect against becoming a victim of this crime. Furthermore, the presentation will introduce conference goers to the Utah Attorney General's Identity Theft Reporting Information System (IRIS)—the only statewide online ID theft reporting web site that allows citizens to report ID theft online and which includes step-by-step resolution instructions as part of the reporting process. Attendees will learn how to access IRIS, how to help victims through the reporting process, how the IRIS delivery system works and the benefits it provides to victims of ID theft. They will also learn about the latest investigative techniques, and how the Attorney General's office handles identity theft cases through prosecution. Finally, the take away is to provide the audiences with a clear understanding of ID theft and what the Utah Attorney General's office is doing about it.
